Education

New York University <i>Ph.D. in Electrical and Computer Engineering, Advisor: Theodore S. Rappaport</i>	<i>Sept. 2023 – Present</i>
New York University <i>M.S. in Electrical Engineering [Thesis]</i>	<i>Sept. 2023 – May 2025</i>
Chongqing University of Posts and Telecommunications <i>B.E. in Communication Engineering (Hons)</i>	<i>Sept. 2019 – Jun. 2023</i>

Research Experience

NYURay: Python-Based Ray Tracer for Wireless Channel Prediction <i>Research Advisor: Prof. Theodore S. Rappaport (IEEE Life Fellow)</i>	<i>Sept. 2024 – Present</i>
---	-----------------------------

- Implemented reflection, diffraction, penetration, and scattering propagation mechanisms in a Python-based calibrated ray tracer for high-fidelity site-specific channel prediction across the upper mid-band spectrum.
- Developed GPU-accelerated ray tracing algorithms achieving $100\times$ speedup, enabling simulation of 10^6 rays in complex environments in under 3-5 seconds per TX-RX pair.
- Created 3D visualization tools for spatial channel analysis, including transmitter-receiver placement, antenna radiation patterns, and antenna orientation.

Material-Aware 3D Reconstruction for Wireless Ray Tracing <i>Research Advisor: Prof. Theodore S. Rappaport and Prof. David Fouhey</i>	<i>Sept. 2023 – Present</i>
---	-----------------------------

- Developed an automated framework generating ray-tracing-compatible 3D models with electromagnetic material properties from RGB video, reducing reconstruction time from months to a few hours.
- Integrated MAST3R-SLAM point cloud generation, PTV3 semantic segmentation, and Qwen3-VL vision-language model to automatically classify and label the object materials.
- Validated framework via dual-band measurements (6.75 GHz, 16.95 GHz) across 12 TX-RX locations in a 700 m² factory using NYURay ray tracer, achieving comparable RMSE to manual baseline.

Waste Factor: A New Metric for Evaluating Power Efficiency <i>Research Advisor: Prof. Theodore S. Rappaport</i>	<i>Jan. 2023 – Present</i>
---	----------------------------

- Developed a novel metric, Waste Factor (W), to evaluate power efficiency in ANY cascaded systems.
- Enhanced Waste Factor for data center energy efficiency analysis.
- Extended the metric to analyze MIMO systems and simulated the distributed MU-MIMO system's energy efficiency and total power consumption.

FR3 Radio Propagation Measurement and Channel Modeling <i>Research Advisor: Prof. Theodore S. Rappaport</i>	<i>Nov. 2023 – May. 2024</i>
---	------------------------------

- Conducted comprehensive FR3 measurement campaigns at NYU for 6.75 GHz and 16.95 GHz [[Video](#)].
- Developed statistical channel models for outdoor, indoor, and factory environments.
- Performed penetration loss and cross-polarization discrimination (XPD) measurements.

Capacity of a Binary Channel with a Time-Bounded Adversary  <i>Research Advisor: Prof. Sundeep Rangan (IEEE Fellow) and Prof. Elza Erkip (IEEE Fellow)</i>	<i>Feb. 2024 – Present</i>
---	----------------------------

- Derived worst-case adversarial capacity for binary input memoryless channels where adversaries overwrite a fraction of symbols, modeling hardware errors and receiver attacks.
- Achieved capacity using random interleaver with thresholded LLR decoder via infinite shared randomness for coordinated interleaving, enabling direct implementation on existing standard decoder architectures.
- Validated both theoretical and practical capacity through AWGN simulations with M-QAM modulation and LDPC codes, showing worst-case adversaries maximize disruption by targeting highly reliable bits.

Experience

6G Wireless and Machine Learning Intern

MediaTek USA Inc.

May 2024 – Aug. 2024

Warren, NJ

Supervisor: [Doru Calin](#), AVP, Head of U.S. 6G Wireless Research Center

- Collaborated with the research team on TN-NTN coexistence solutions.
- Developed joint beamforming algorithms for TN-NTN coexistence and interference management.

6G Wireless and Machine Learning Intern

MediaTek USA Inc.

May 2025 – Aug. 2025

Warren, NJ

Supervisor: [Doru Calin](#), AVP, Head of U.S. 6G Wireless Research Center

- Contributed to the development of MediaTek's internal ray-tracing tool and validated simulation results against real-world measurements.
- Built automated indoor reconstruction pipelines and performed ray-tracing simulations for outdoor-to-indoor coverage prediction across entire buildings.

Patents

- [P1] T. S. Rappaport, **M. Ying**, “AMAR: Automated Material-Aware Indoor 3D Reconstruction for Wireless Digital Twin,” U.S. Patent Application No. 63/862,136 (NYU ref. RAP03-20PRO), filed Aug. 12, 2025.
- [P2] T. S. Rappaport, **M. Ying**, “Site-Specific Propagation Predictions of the Radio Channel in Different Environments Using NYURay Based on Measurements and Ray-Tracing at Upper Mid-Band Frequencies,” U.S. Patent Application No. 63/814,769, filed May 30, 2025.
- [P3] O. Kanhere, T. S. Rappaport, D. Shakya, **M. Ying**, “Waste Figure and Waste Factor: A New Metric for Evaluating Power Efficiency in any Cascade,” U.S. Patent Application No. 63/574,024, filed Apr. 3, 2024.
- [P4] T. S. Rappaport, D. Shakya, **M. Ying**, “Using Waste Factor to Optimize Energy Efficiency in Single-Input Single-Output and Multiple-Input Multiple-Output Systems,” U.S. Patent Application No. RAP03-11PRO2, filed Apr. 9, 2024.
- [P5] Y. Xu, **M. Ying**, and Q. Chen, “A Robust Energy Efficiency Optimization method for RIS-Assisted WPCNs,” Chinese Patent CN113613273A, Nov. 5, 2021. [\[Link\]](#)

- [P6] Y. Xu, **M. Ying**, and J. Zhou, “A Robust Resources Allocation Algorithm for RIS-Enhanced WPCNs,” Chinese Patent CN113825159A, Dec. 21, 2021. [\[Link\]](#)

Technical Skills

Programming: Python, MATLAB, C/C++, L^AT_EX, HTML, JavaScript

ML/CV Frameworks: PyTorch, TensorFlow, OpenCV, Open3D

Tools & Software: Blender, MeshLab, Cadence Virtuoso, HFSS, Altium Designer, Power BI, Inkscape

Research Areas: Channel Modeling, Ray Tracing, 3D Reconstruction, Energy Efficiency, Information Theory

Honors and Awards

- **Best Paper Award**, IEEE Global Communications Conference (GLOBECOM) 2023
- **Li Publication Award**, NYU Tandon School of Engineering
- **National Scholarship**, Chinese Government (Top 1%)
- **Ernst Weber Fellowship**, Department of Electrical and Computer Engineering, NYU
- **Meritorious Winner**, International Mathematical Contest in Modeling (MCM), 2022
- **National Second Prize**, Contemporary Undergraduate Mathematical Contest in Modeling, 2021
